CALADIUM ESCULENTUM.

CALADIUM ESCULENTUM.

One of the most showy of ornamental foliage plants in cultivation, either for the conservatory or for planting out on the lawn; of easy culture and will grow in any garden soil. Leaves very large, of a green color, and beautifully veined and variegated with darker green. Plants should be abundantly supplied with water, which will produce a more luxuriant growth of leaves. In the autumn remove the roots to the cellar and pack in dry sand, out of the reach of frost. Every collection, however small, should contain at least one of these plants. For prices see below.

JAPANESE FERN BALL IN LEAF—18 to 24 inches across.

This little beauty from Japan is the finest addition to the Fernery yet introduced, and the most satisfactory house fern ever offered.

**FOR THE WINDOW, DRAWING ROOM, OR SUSPENDED FROM
CHANDELIER, OVER DINING TABLE, OR USED IN FERN DISHES.**

The Balls are composed of the Japanese Island Fern Roots and Sphagnum Moss, and so constructed as to send out leaves of beautiful emerald green.

They Grow Rapidly and make handsome ornaments for the home conservatory or greenhouse.

Directions—Place in water for several hours and then suspend in any desired position; repeat every two days until growth has started, after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the fern in a flourishing condition. To use the fern dish cut ball in halves, placing flat side down, thus getting two dishes of beautiful ferns. They may be allowed to dry up at any time and be set away, and started again by watering it as before.

Fern Balls, 8 inches in diameter, 35c each; \$3.75 a doz.; \$30.00 per 100.

The "Lightning" Sprayers.

No. 20 Sprayer has detachable glass reservoir provided with our patent spring leather plunger expander, which at all times keeps the leather washer expanded and will not allow it to wrinkle or dry up which is the case in other sprayers. This Sprayer is the only one having a glass reservoir, detachable, encased so that the operator at all times can see the ingredients mixing and just how they are working. The glass reservoir is made like a Mason fruit jar, and any such will fit this sprayer. Being oblong it gives a churning motion while the sprayer is being used, mixing the ingredients—which cannot be done with any other shaped sprayer—and will not allow Paris green to settle. The glass sprayer will not corrode or rust out, as is the case with metal.

No. 20 Lightning Glass Sprayer, \$6.00 per doz.

Retails at 75c each.

"Lightning" Whirling Sprayer No. 15.

This Sprayer holds two quarts, is nicely finished, making it very neat and attractive. This Sprayer is best adapted for garden use, greenhouses, house plants; also for washing windows, sprinkling clothes and floors. For killing insects on garden plants it has no equal.

It throws a powerful spray, which is accomplished by squeezing the rubber bulb, as shown in cut. The operator can produce a light or heavy spray at will, and can spray in any direction. It will spray from five to twenty-five feet high and is easy to operate.

No. 15 Lightning Whirling Sprayer, \$ 9.00 per doz. Retails at \$1.00 each.
No. 16 " Bulb Sprayer, 2 gal. 12.00 " " 1.50 "

The "Lightning" Sprayer No. 21.

OPERATED BY COMPRESSED AIR.

Our No. 21 "Lightning" Sprayer is made of heavy galvanized iron, also made of brass. It is provided with safety valve to prevent over pressure, shoulder strap, three feet of the best hose, with faucet and nozzle which will throw a fine mist-like spray or a solid continuous stream 30 feet high.

Our "Lightning" Sprayer is provided with a strainer as shown in cut so that no sediment can pass through nozzle without being strained, and prevents clogging, which is a great improvement over all compressed air sprayers and is patented. The spray works automatically and may be charged in 15 seconds by a few strokes of the pump. A boy can operate the "Lightning" as well as a man. This sprayer is provided with spring faucet which may be operated with one hand at the will of the operator. Pump in a few strokes of air and the sprayer will hold the pressure from one to six days, which no other sprayer will do. After the air is pumped into the "Lightning" Sprayer there is no more labor required. It is the only compressed air sprayer that will properly spray white wash without clogging. If the sprayer is to be used to spray white wash it must be provided with our special strainer and nozzle. Full directions accompany each sprayer.
